Spider veins
Tingling
Burning
Throbbing
Cramping
Itchiness
Leg fatigue
Leg Heaviness
Restless legs
Discoloration
Inflammation
Ulceration

Endovenous laser ablation is a “state of the art” minimally invasive alternative to conventional surgical stripping. Now you can rest assured knowing that there is a quick, effective outpatient procedure which can treat the pain and appearance of varicose veins. Most patients are able to return to normal activities within a week.

Chinook Vascular* currently offers:

Endovenous Laser Ablation
Foam Echosclerotherapy
Liquid sclerotherapy
Compression stockings

*An accredited, non-hospital surgical facility
